## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 1, drawn to a method for manufacturing a twisted handle of a hand tool, classified in class 29, subclass 458.
  - II. Claims 2-4, drawn to a device for twisting a handle of a hand tool, classified in class 72, subclass 299.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the device of Group II can be used to practice another and materially different process such as one that does not require forging, annealing, machining, polishing, heat treating, vibrating and electropolishing of the hand tool handle.
